

Fungus & Insect Control

Ornamentals • Houseplants

INSECTICIDE

Azalea Evergreen Food (Fertilome)

sprinkle around acid loving plants (evergreens, hydrangeas, azaleas, rhododendrums) in spring and fall, works systemically against insects.

Systemic Rose (Fertilome)

controls insects on roses, spray 3x a season.

Eight (Bonide)

foliar spray, excellent all purpose, fast acting, controls most insect problems, highly effective on japanese beetles (Eight can be used on listed vegetables, long lasting residual control).

Tree & Shrub Insect Control (Bonide)

water into trees & shrubs, works systematically, apply 1x/year, best if applied in fall but can apply at initial planting, preventative (Japanese Beetles, Borers & Leaf Miners).

Systemic Houseplant Insect Control (Bonide)

easy to use granules that provides preventative insect control for 8 weeks.

Ant Killer (Bonide)

sprinkle around perimeter of house or any ant hills.

Sluggo Plus (Monterey)

organic slug & insect control, great for any crawling insect, safe on edibles and around pets.

Tanglefoot

sticky, apply around tree trunk (over tree wrap), stops birds, caterpillars & gypsy moths.

FUNGICIDE

Infuse (Bonide)

systemic fungicide, use on ornamentals only, effective for a wide range of fungal diseases, controls powdery mildew. Use as a preventative and a curative.

ALL-IN-ONE FUNGUS & INSECT CONTROL (Insecticide, Miticide, Fungicide)

3-in-1 Insect & Disease Control (Bayer)

foliar spray for insects, mites and fungus, this is a curative, not a preventative. Systemic action throughout the plant reaches all parts. Ornamentals only, long lasting control.

Triple Action (Fertilome)

foliar spray for insects, mites and fungus, spray to the point of dripping, reapply 7-10 days later if needed. This is a curative, not a preventative.
